

California OES

Weekly Weather Threat Briefing

September 5, 2018
1:30 PM PDT

Day 2-4: Primary Hazards: Moderate heat risk across portions of southern California Friday through Sunday.

National Weather Service
*Western Region Headquarters
Regional Operations Center
Salt Lake City, UT*

Prepared by: Eric Schoening and Julie Malingowski

Key Points

September 6, 2018 - September 12, 2018

Thursday-Sunday

- A warming trend will begin Thursday, with the hottest temperatures expected Friday through Sunday across portions of southern California. This will likely lead to moderate heat risk for sensitive groups over the weekend.
- Increasingly gusty winds in the Sierra on Saturday may aid in faster growth of new and existing wildfires.
- Gusty winds and increased waves Friday onward will lead to increased marine/coastal impacts along most of the California coastline.

Monday-Tuesday

- Temperatures will trend cooler to start the work week, but heat risk could still continue in southern California for those extremely sensitive to heat.
- Gusty winds and increased waves will continue to create marine/coastal impacts along most of the coastline to begin the week.

California OES Impact Threat Matrix
